- Topic 7A: Ensure Accessibility
- Topic 7B: Upload Files onto a Site

Appendix A: Mapping Element K's Macromedia Dreamweaver 8 Level 1 Course to the Dreamweaver Developer Certification Exam Objectives

Course Specifications

Course number: 084533
Software: Dreamweaver
Course length: 1.0 day(s)

Course Description

You want to make some information available on the Internet. To do this, you might want to design and build a website and upload it. The features and functions in Dreamweaver 8 will enable you create a web page to suit your requirements.

Course Objective: You will describe the basic functions and features of website development using Dreamweaver 8.

Target Student: This course is intended for the web developers and designers who are familiar with working with the Windows 2000 or Windows XP operating systems.

Prerequisites: The user should have an understanding of how to use Microsoft Windows 2000 or Windows XP operating systems.

Delivery Method: Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Hardware Requirements

- An Intel Pentium II (or equivalent 300+ MHz) processor.
- At least 96 MB of available RAM (128 MB recommended).
- At least 275 MB of available disk space for software installation, and an additional 10 MB for the course data files.
- A 256-color monitor capable of 800 x 600 resolution (1024 x 768, millions of colors recommended).
- A CD-ROM drive.

Platform Requirements

- Windows XP Professional, Windows 2000, Windows 98, or Windows NT with Option Pack 4.

Software Requirements

- The latest version of Netscape Navigator and Microsoft Internet Explorer.
- Macromedia Dreamweaver 8

Performance-Based Objectives

Upon successful completion of this course, students will be able to:

- design a website. You will also explore the Dreamweaver environment and identify the HTML tags in the file.
- define a website. You will also create and save a web page.
- organize site files using the Files panel. You will also create templates that help you develop multiple pages easily.
- add content to a web page.

- identify the different types of links and create them for easy navigation.
- create frames to enhance navigation within a website.
- upload a website.
